

TUBULAR HEAT EXCHANGERS

Fischer Tubular Heat Exchangers are developed and optimized for the food industry. Their hygienic and easy-to-handle design allows application in a variety of purposes, especially with liquid products containing particles. The modular system can be easily adapted to different applications.

Applications:

- Dairy products like yoghurt, whey, UHT-milk, milk-mix drinks...
- Fruit and vegetable juices
- Fruit concentrates, nectars, purees, mashes
- Jams and yoghurt fruits
- Viscous food like ketchup, sauces, desserts, liquid-egg,...
- Pharmaceutical products
- Chemical products
- Other media containing particles like effluents or sewage...

- Flexible field of application in your production
- Hygienic, simple design
- Simple installation
- Low maintenance
- Easily adaptable owing to modular system
- Austrian high quality product
